

# FEMA

**Disclaimer:** The purpose of this briefing is to provide a ***Regional*** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to <http://www.srh.noaa.gov> and click on the "Weather Forecast Offices" tab and click on the map for your area.

## FEMA Region 6 Weather Threat Briefing

Tuesday, July 14, 2015

Issued: 0800 CT

***Day 1 Hazards: Few thunderstorms over NM & OK/TX Panhandles. Isolated severe storms possible across NE AR. Heat index values of 102-108 degrees over much of TX, OK, AR, and LA.***

National Weather Service

Southern Region Headquarters  
Regional Operations Center  
Fort Worth, TX

Prepared by: Orlando Bermudez  
817-978-1100 x 147

# Key Points

## Today

- Locally heavy rain may cause areas of flash flooding over western NM, especially in/near burn scar locations
- There is a slight change of severe storms over the NE AR
  - Main weather threats will be damaging winds and localized flash flooding
- Heat index values will be in the 102-108 degree range for the much of northern and eastern TX, eastern OK, AR and northern LA

## Wednesday - Friday

- High pressure dominates the Region with generally dry/hot conditions expected.
  - Heat index values will continue to be in the 102-107 range for the N and E TX, eastern half of OK, AR and N LA.

## Tropical Outlook

- Tropical Storm Claudette in N Atlantic will move northeast. There are no impacts to FEMA 6 from TS Claudette. Additional tropical cyclone formation is not expected during the next 5 days

# \*FEMA Region 6 Threat Matrix

Jul 14, 2015 - Jul 18, 2015

DAY/ THREAT	TUE	WED	THU	FRI	SAT
Severe Weather	NE AR				
Heavy Rain /Flash Flooding	W NM/NE AR				
Heat	TX, OK, AR, N LA				
Tropical					

	Very Common – Happens Often
	Common – Happens Frequently
	Uncommon – A Few Times a Year
	Rare – Once Every 1-5 Years
	Very Rare – Once Every 5-10 Years

*We are experimenting with a new color scale to the left as of April 13<sup>th</sup>. Please provide feedback to [sr-srh.roc@noaa.gov](mailto:sr-srh.roc@noaa.gov). See next slide for more details.*

**We are experimenting with a new color scale in these briefings, starting on April 13<sup>th</sup>. The criteria is below, please provide your feedback to [sr-srh.roc@noaa.gov](mailto:sr-srh.roc@noaa.gov) and we plan to re-evaluate in the coming months.**

**Weather "Threat" Matrix**

Color	Definition	Criteria	Example(s)
<b>Green</b>	<b>Very Common – Happens Often</b> Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None	<ul style="list-style-type: none"> <li>Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees</li> <li>Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX</li> </ul>
<b>Yellow</b>	<b>Common – Happens Frequently</b> Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Minor Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline	<ul style="list-style-type: none"> <li>2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible</li> <li>Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail</li> </ul>
<b>Orange</b>	<b>Uncommon – A Few Times a Year</b> Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Large Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline	<ul style="list-style-type: none"> <li>A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely</li> <li>Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail</li> </ul>
<b>Red</b>	<b>Rare – Once every 1-5 Years</b> Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Major Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline	<ul style="list-style-type: none"> <li>A Category 1 hurricane will be moving towards the NW Gulf in the next few days</li> <li>Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail</li> </ul>
<b>Purple</b>	<b>Very Rare – Once Every 5-10 Years</b> Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically results in Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline	<ul style="list-style-type: none"> <li>A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow</li> <li>Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms</li> </ul>

# Atlantic/Gulf Tropical Weather Outlook

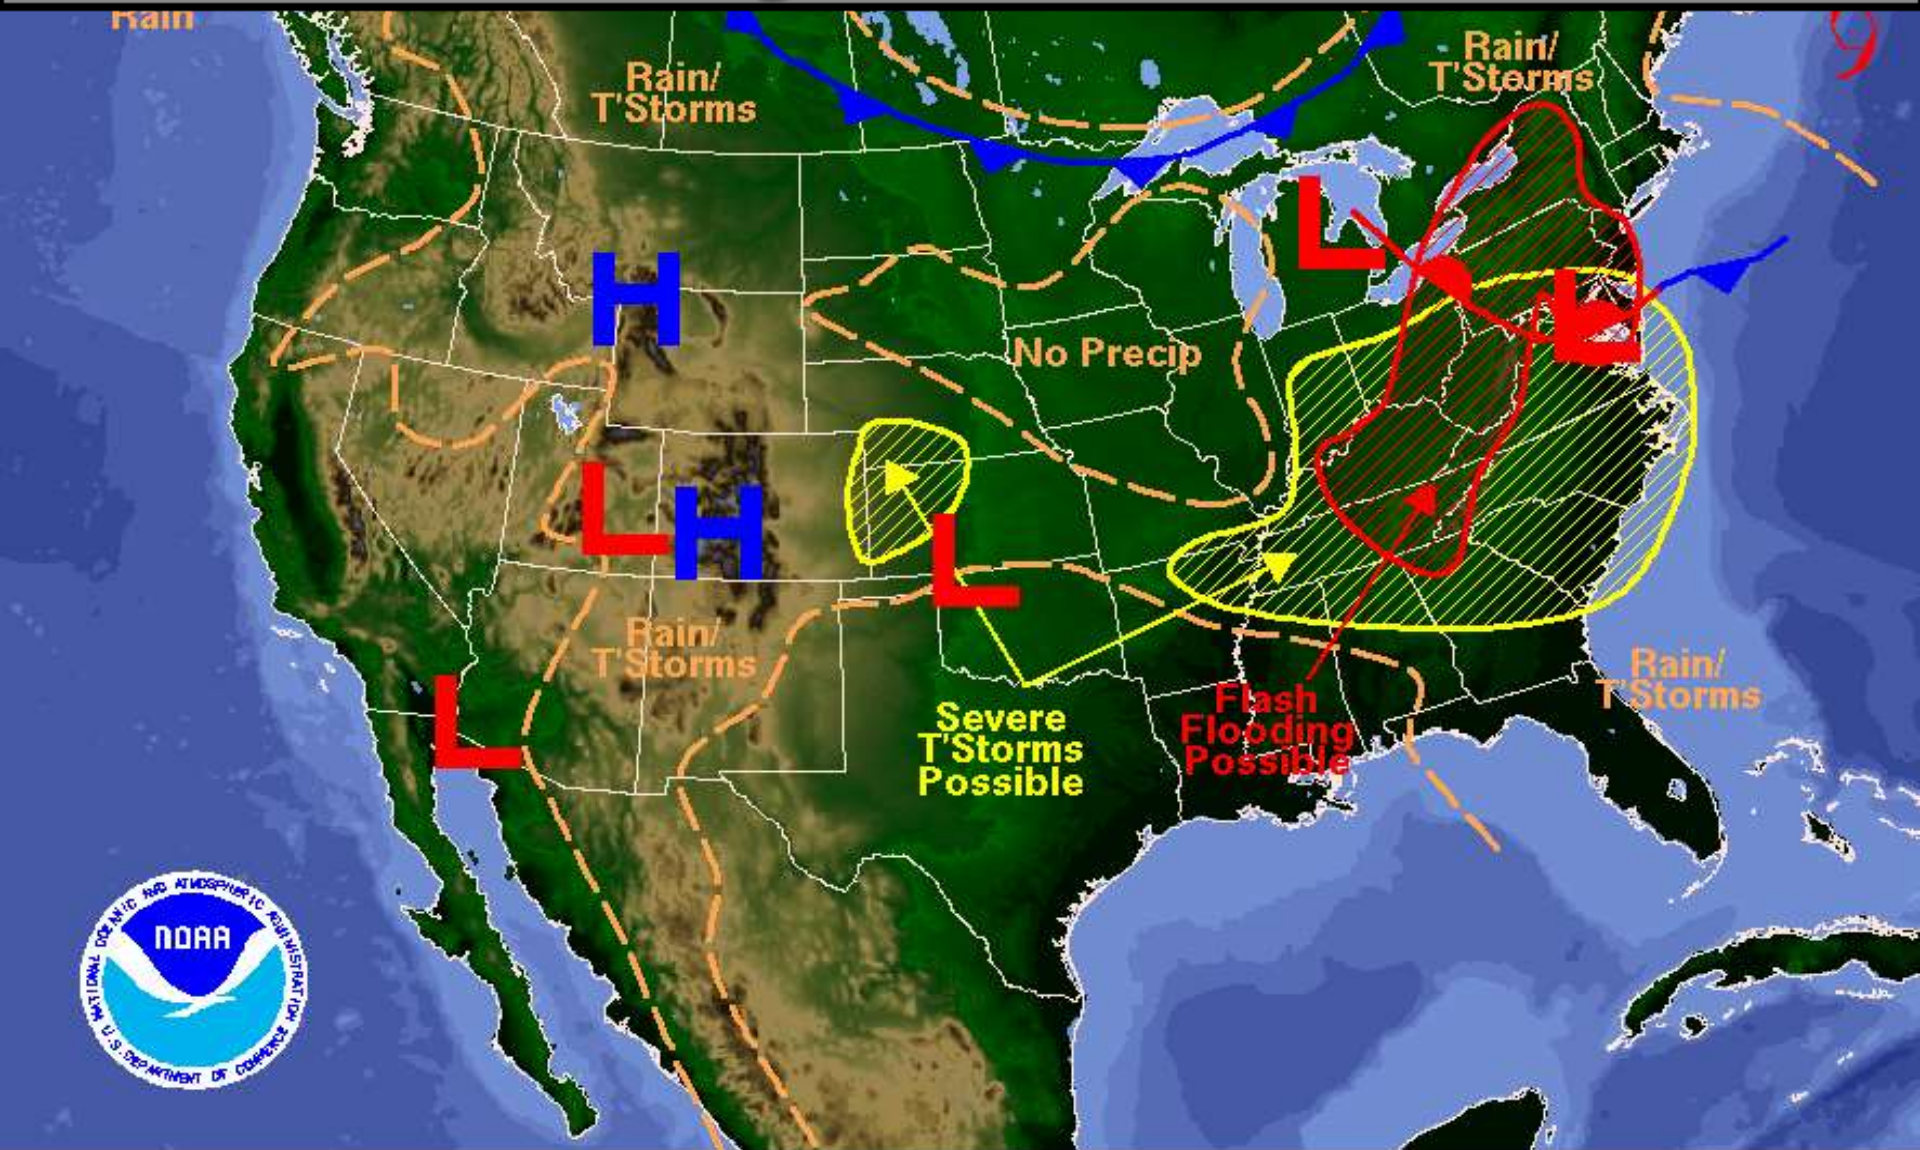

Tropical cyclone formation is not expected during the next five days.

# Today's Weather

Weather Forecast for Tue, Jul 14, 2015, issued 4:35 AM EDT  
DOC/NOAA/NWS/NCEP/Weather Prediction Center  
Prepared by Pereira based on WPC, SPC and NHC forecasts

# Day 1 Weather Hazards

**Valid: 0800 Tue - 0800 Wed**

**A few strong  
thunderstorms  
possible along  
with locally  
heavy rainfall**

**A few severe  
thunderstorms  
possible along  
with locally heavy  
rainfall**

**Heat index values will be in the 102-108  
degree range for eastern TX, OK, AR & N LA**

	Very Common – Happens Often
	Common – Happens Frequently
	Uncommon – A Few Times a Year
	Rare – Once Every 1-5 Years
	Very Rare – Once Every 5-10 Years

**\*Threat levels are based on FEMA  
Region 6 criteria. State or local  
threat level criteria may differ.**

# Tuesday, July 14, 2015

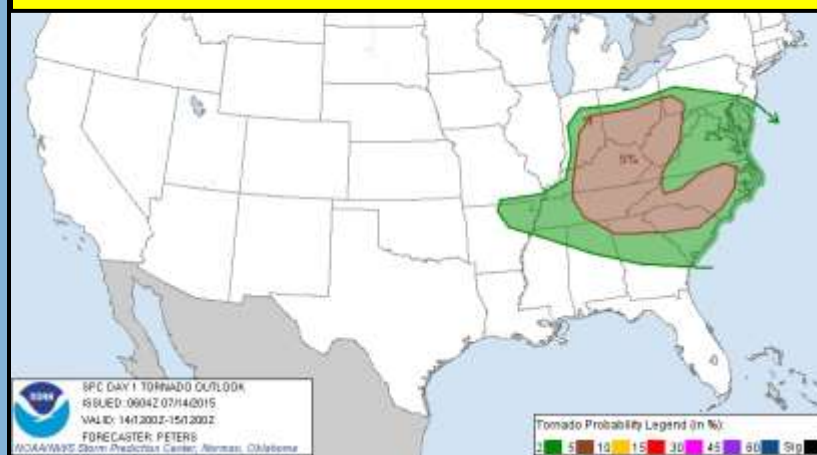

## Severe Thunderstorm Potential

### Overall Threat Potential

### Probability of Tornado within 25 miles of a point

### Probability of Damaging Hail within 25 miles of a point

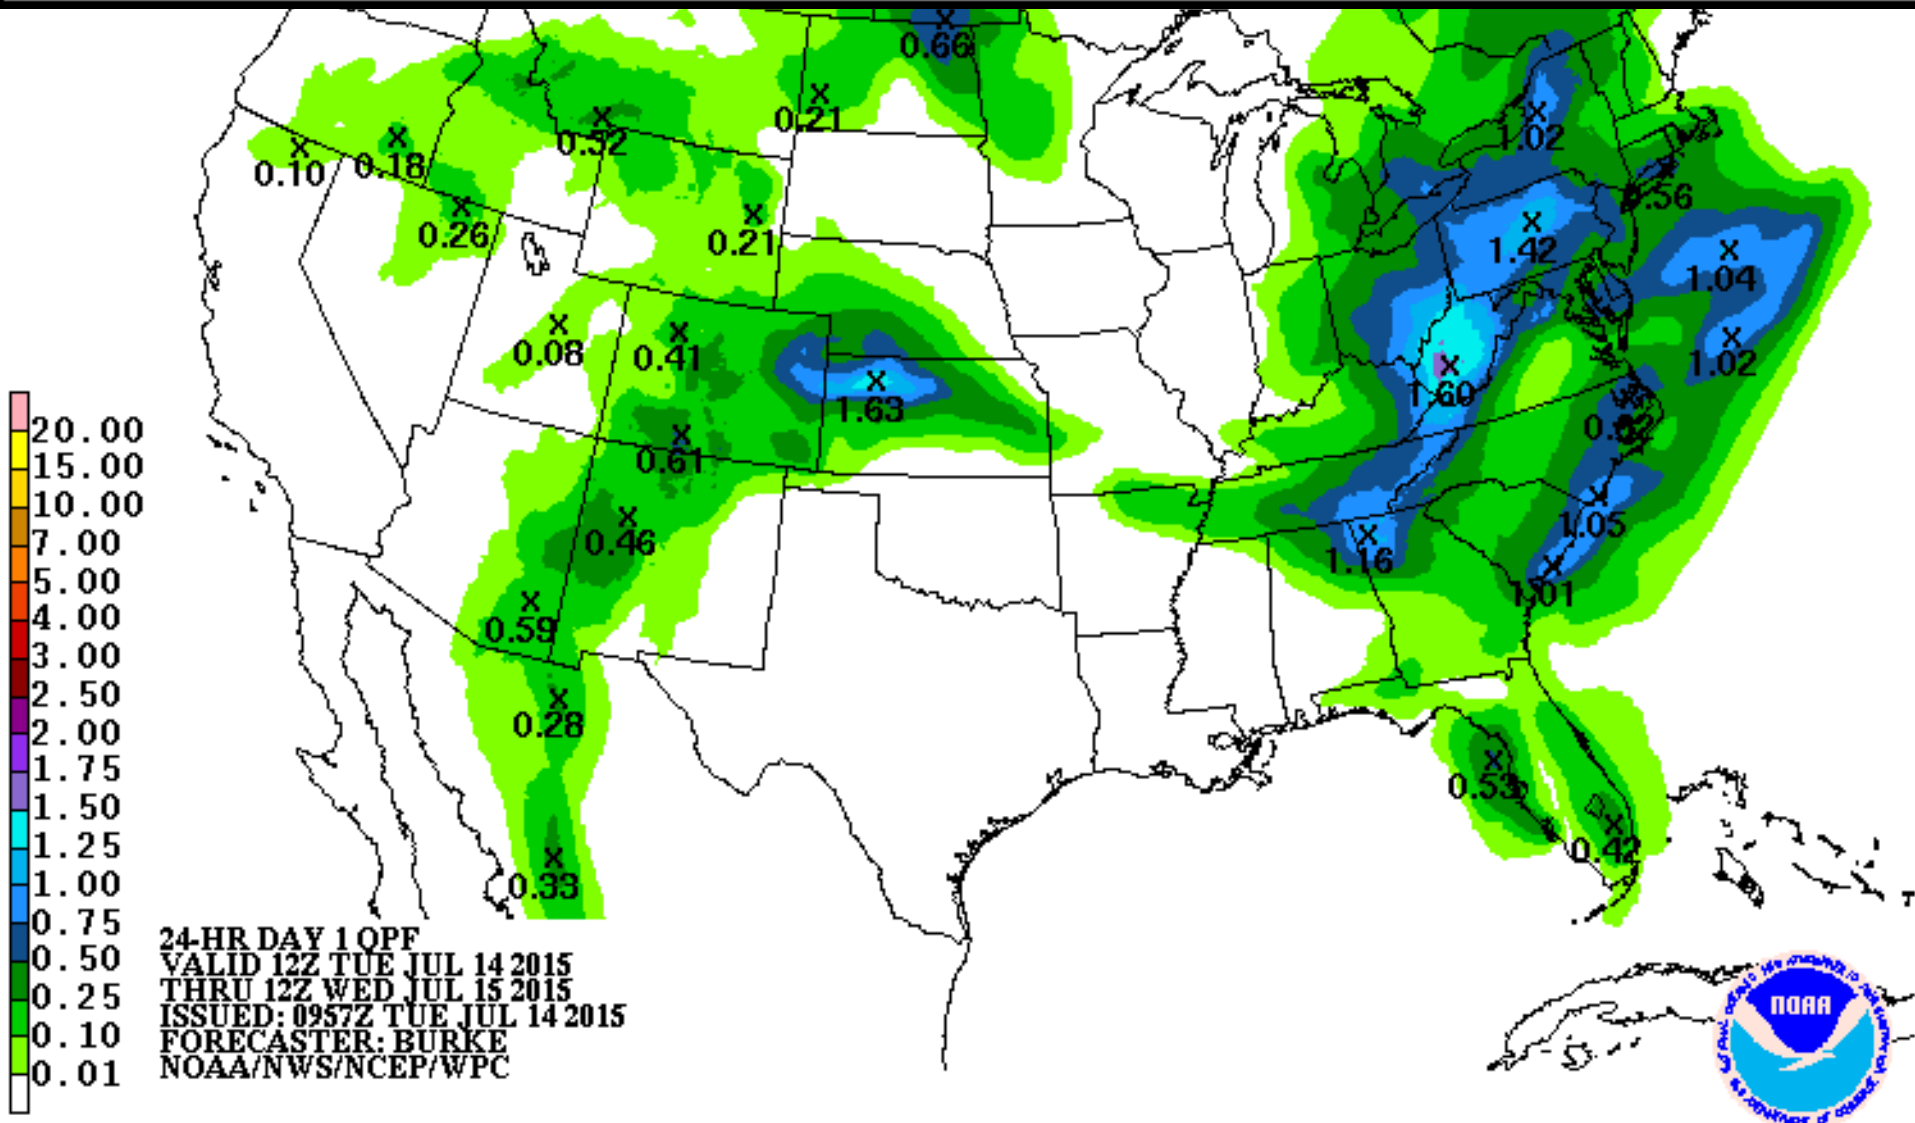

### Probability of Damaging Winds within 25 miles of a point

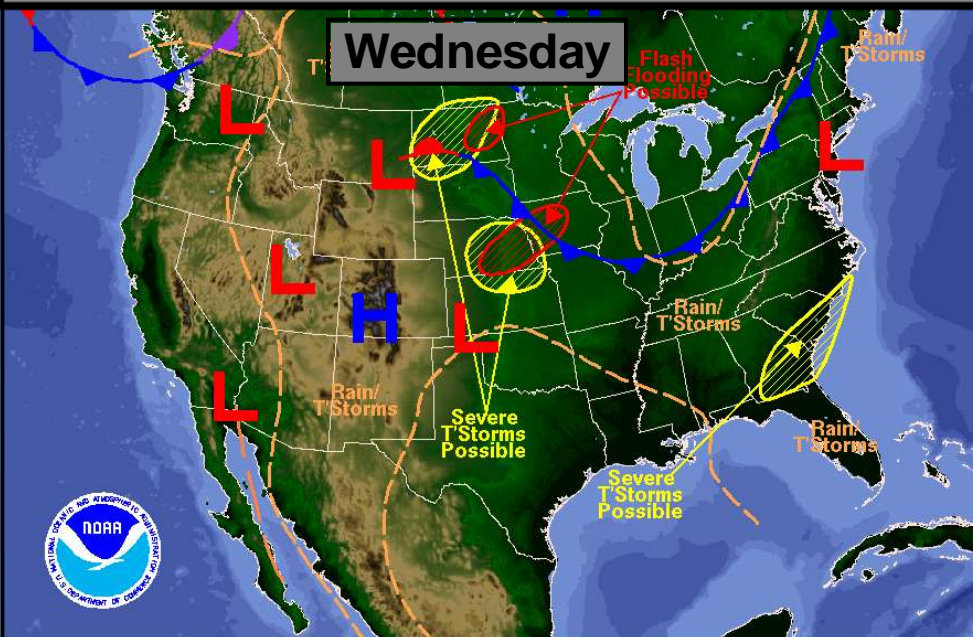

# Today's Precipitation

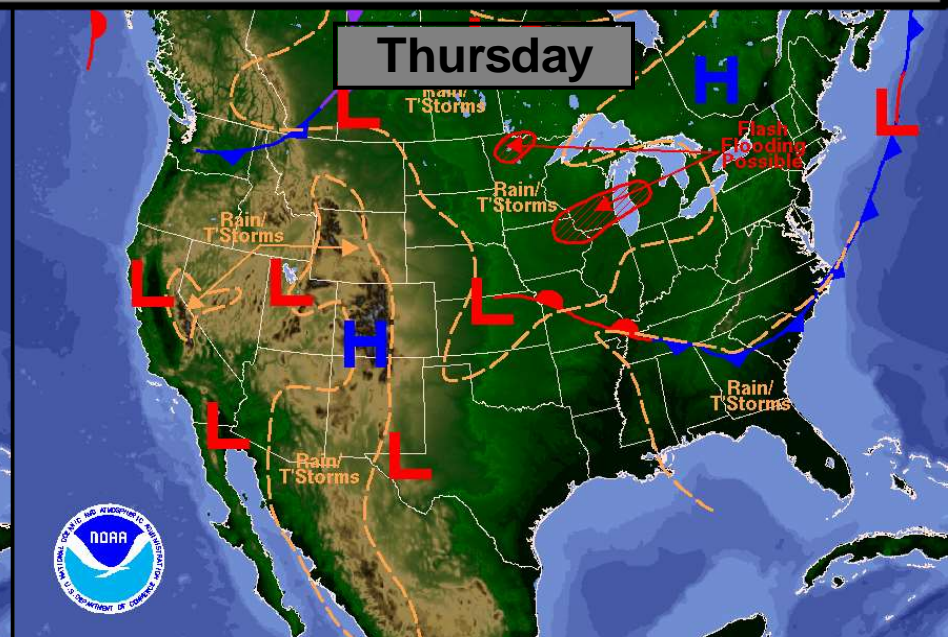

## Tue AM - Wed AM

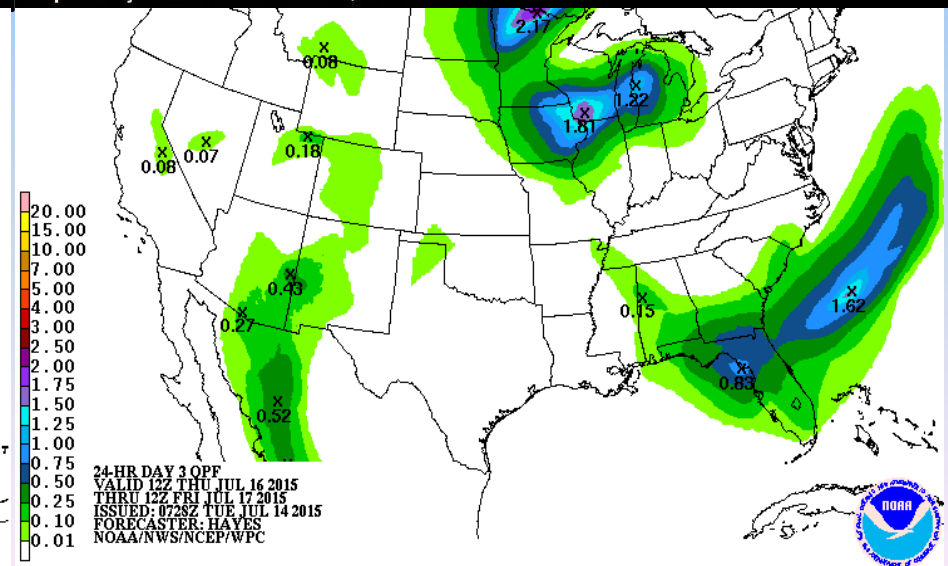

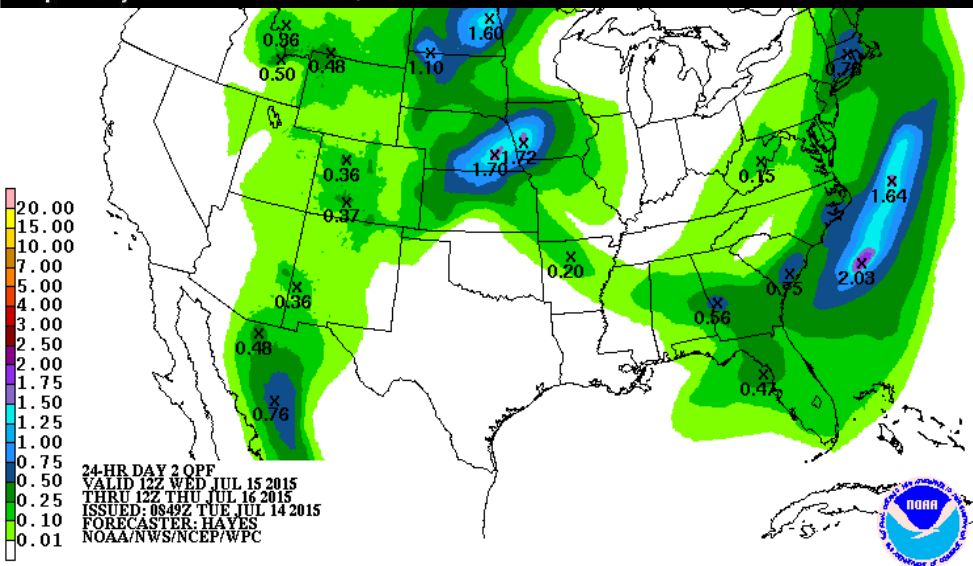

# Day 2-3 Weather Maps/Precipitation

Weather Forecast for Wed, Jul 15, 2015, issued 4:40 AM EDT Tue, Jul 14, 2015  
 DOC/NOAA/NWS/NCEP/Weather Prediction Center  
 Prepared by Pereira based on WPC, SPC and NHC forecasts

Weather Forecast for Thu, Jul 16, 2015, issued 4:44 AM EDT Tue, Jul 14, 2015  
 DOC/NOAA/NWS/NCEP/Weather Prediction Center  
 Prepared by Pereira based on WPC, SPC and NHC forecasts

# Day 2-3 Weather Hazards

Valid: 0800 Wed - 0800 Fri

Locally heavy rainfall may produce flash flooding Wednesday

Heat index values continue to be in the 102-107 degree range for N TX, eastern OK, AR, N LA

\*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

# Day 4-5 Weather Hazards

Valid: 0800 Fri - 0800 Sun

Heat index values continue to be in the  
102-107 degree range for  
eastern OK, AR, TX, N LA

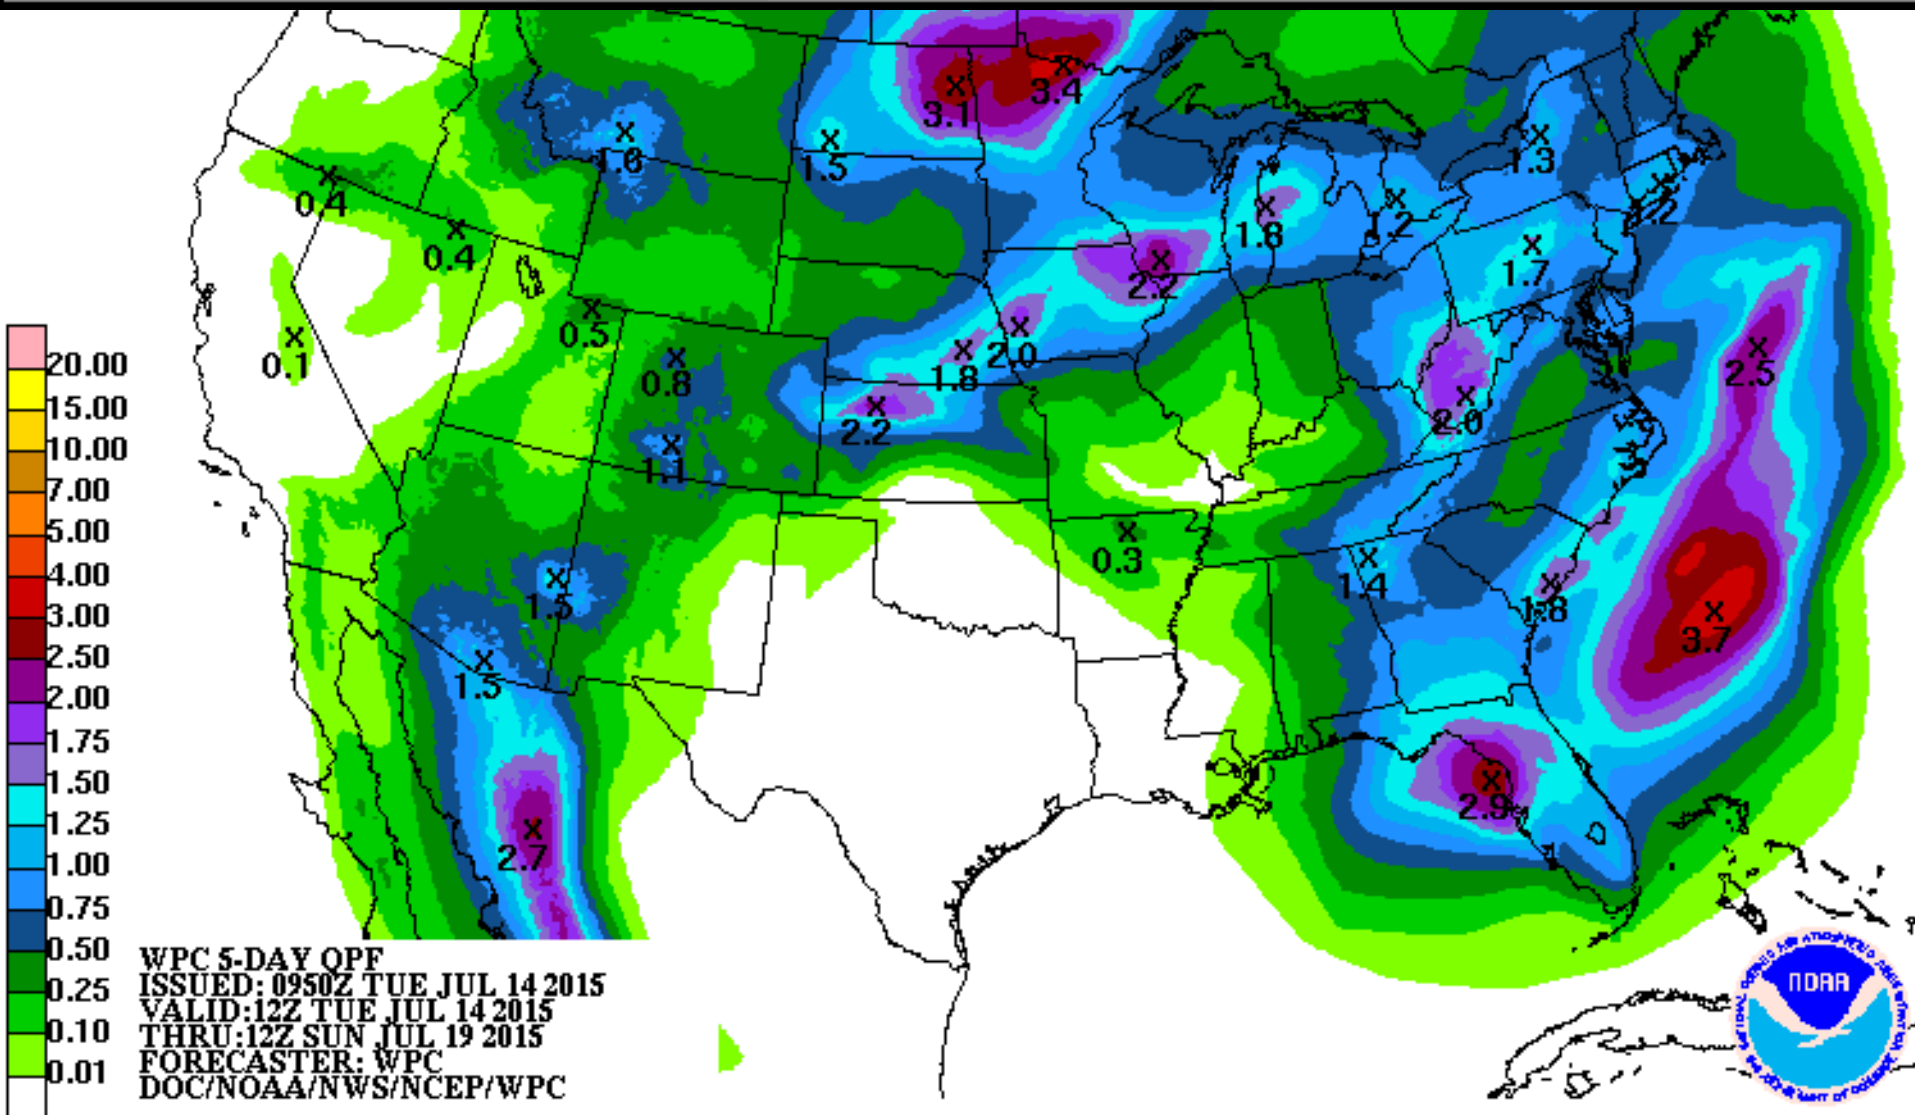

\*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

# 5-Day Precipitation

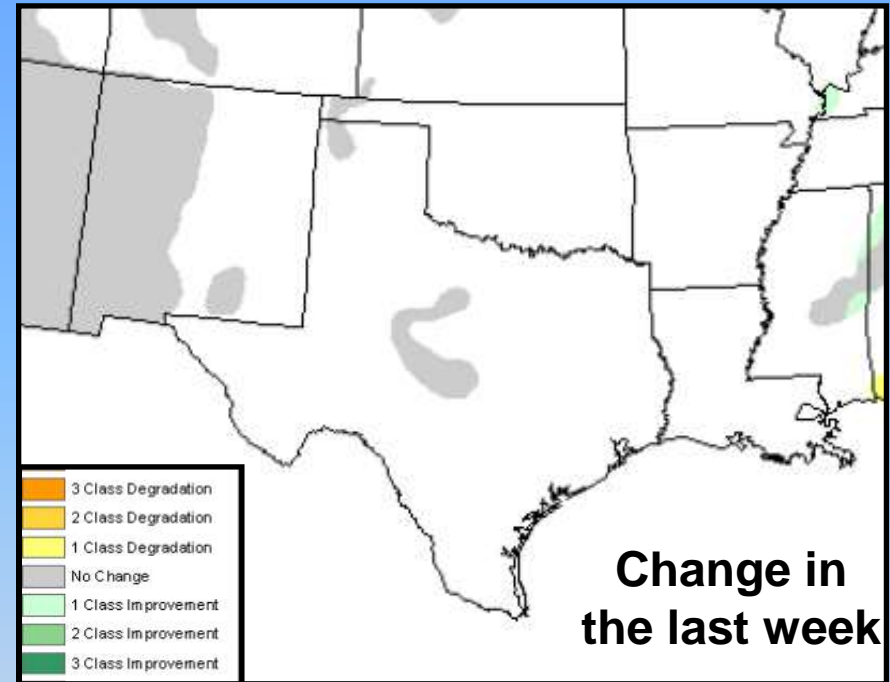

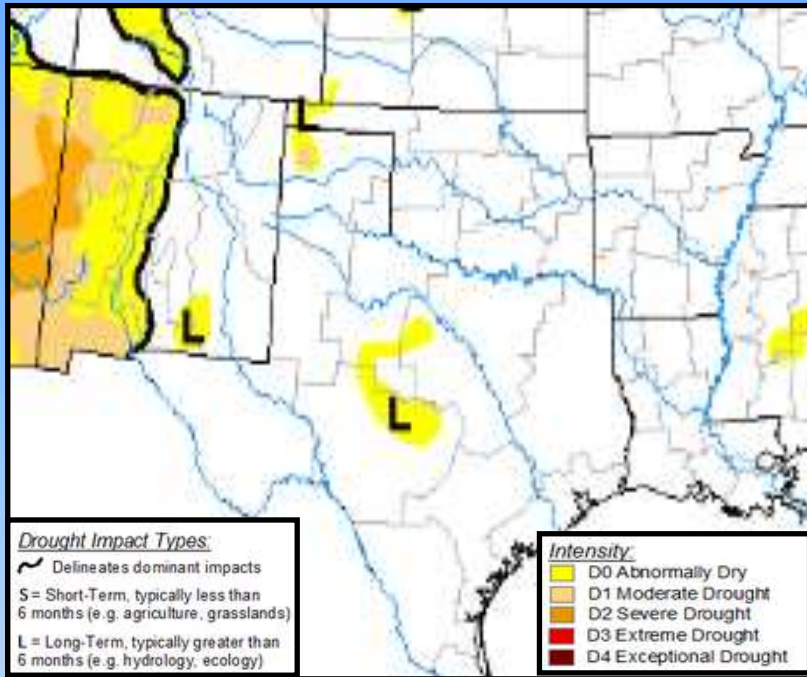

## Tue AM - Sun AM

# Drought Monitor Released July 9th, 2015

Data valid as of Tuesday July 7th, 2015

## Drought Conditions (Percent Area) in D3-D4 (Extreme to Exceptional Drought)

State	Current	Last Week	3 Months Ago	1 Year Ago
Oklahoma	0.00%	0.00%	37.38%	30.05%
Texas	0.00%	0.00%	15.10%	18.36%
New Mexico	0.00%	0.00%	0.00%	42.29%
Arkansas	0.00%	0.00%	0.00%	0.00%
Louisiana	0.00%	0.00%	0.00%	0.00%

# Space Weather 3-Day Forecast

	Tuesday	Wednesday	Thursday
Geomagnetic Storms	Unsettled (Max Kp = 3)	Quiet (Max Kp = 2 )	Quiet (Max Kp = 1 )
Solar Radiation Storm (S1-S5)	1%	1%	1%
Radio Blackout (R1-R2)	1%	1%	1%
Radio Blackout (R3-R5)	1%	1%	1%
